SOFTWARE ENGINEER | JAVA | AWS CERTIFIED

Senior Software Engineer with 6+ years of experience building backend systems in Java, Spring Boot and Spring MVC, mostly in enterprise and healthcare settings. I've worked on microservices, REST APIs, and event-driven architectures using Kafka and RabbitMQ — including a vehicle recall management platform and large-scale healthcare integrations. AWS Certified.

TECHNICAL SKILLS

Languages: Java (Primary), JavaScript/TypeScript (Node.js)

Frameworks & Libraries: Spring, Spring Boot, Hibernate, Struts 2 HTML, Tailwind CSS, Angular, JavaScript, Bootstrap, jQuery, AJAX, JSP

Databases: PostgreSQL, Oracle, MySQL, Microsoft SQL Server, MongoDB (NoSQL), Redis

Cloud & DevOps: AWS (EC2, IAM, Lambda, S3, VPC, RDS, CloudFormation, CloudWatch), Terraform, Jenkins, Docker, GitHub Actions

Data Integration & Analytics: ETL processes, SSIS, Power BI, Kafka, RabbitMQ

Version Control & Workflow: Git, Bitbucket, JIRA, Confluence, Agile/Scrum

Tools: JetBrains Rider, IntelliJ IDEA, Visual Studio, Maven, Gradle, SonarQube, Splunk

WORK EXPERIENCE

AEG Inc (Employer) | Client: Enterprise Mobility, St. Louis, Missouri, United States
Software Engineer II
June 2022 – March 2026

- Migrated legacy SOAP services to RESTful APIs in Spring Boot, reducing integration issues across client systems.
- Moved Spring Batch workloads off on-prem storage to AWS S3, cutting storage costs by 40%.
- Upgraded Java (8 to 17), Spring Boot (2.5 to 3.1), Spring MVC (4 to 5.3), reducing unplanned downtime by 30%.
- Built event-driven microservices using RabbitMQ and OAuth 2.0, improving message throughput by 30%.
- Added Vehicle Recall Audit functionality to a fleet management app, giving compliance teams a cleaner audit trail and reducing manual tracking.
- Debugged production incidents using Splunk, consistently meeting SLA targets.
- Worked directly with product managers to tighten sprint scope, reducing average feature delivery time by 15%.

INFOTECH DOT NET SYSTEMS LTD, Accra, Ghana
Software Engineer
September 2018 – July 2021

- Built RESTful APIs in Spring Boot to connect EHR systems with third-party healthcare services.
- Used Node.js scripts for API polling, data cleanup, and message transformation in healthcare integrations.
- Broke a healthcare monolith into Spring Boot microservices using API Gateway and Eureka, improving uptime for patient-facing services.
- Built Spring Batch jobs to automate daily sync of lab results and billing data, cutting manual work significantly.
- Implemented Kafka to process 100K+ daily healthcare transactions reliably at scale.
- Added Spring Cache + Redis for frequently accessed medical reference data, cutting response times by 40%.

NEW CRYSTAL HEALTH SERVICES LTD, Accra, Ghana
IT Manager
January 2015 – August 2018

- Managed IT operations across a healthcare network, maintaining 99.5% system uptime.
- Digitized health records, cutting data retrieval time by 40%, and led a 12-person IT team.
- Built ETL pipelines and Power BI dashboards using SSIS to consolidate reporting across clinic locations.
- Handled vendor contracts and performance reviews.

ST. JOHN OF GOD HOSPITAL, Duayaw Nkwanta, Ghana
IT Manager
November 2009 – December 2014

- Managed hospital-wide IT strategy, system upgrades, and rollout of health information systems.
- Led vendor selection and implementation of enterprise systems.

EDUCATION

Doctor of Business Administration - Applied Computer Science (in progress, expected. 2028)
Westcliff University, Dallas, Texas

Master of Science in Computer Science (2023)
Maharishi International University, Fairfield, Iowa

Bachelor of Education in Computer Science (2008)
University of Cape Coast, Central Region, Ghana

CERTIFICATIONS

AWS Certified Solutions Architect – Professional (f5823da867e94e5eb95d88fc68c0df1f), 2023
